

At the conference TMCE 2002

At the conference TMCE 2002 (Tools and Methods for Competitive Engineering, Wuhan, China, April 22-26, 2002) SARC has presented a paper called Construction of a manifold ship model, derived from a wireframe mesh, by H.J. Koelman and W.B. Soede. We are proud to announce that this paper received the 'Best Paper Award' from the Paper Review Panel.

TMCE 2002

Tools and methods of
competitive engineering
竞争工程的工具与方法

Recognition of excellence
for original scientific
contribution

The Organizing Committee and the co-chairmen of the Fourth International Symposium on Tools and Methods of Competitive Engineering have the pleasure to recognize your outstanding contribution to the TMCE 2002 Symposium.

They present this Best Paper Award to you for your paper, which has been selected by the Review Panel as the most original academic work.

Professor Dr. Imre Horváth
co-chairman
